

UbiqPower Technology Inc. presents

Zero Cost EV Charger

Program

With over 11 years of EV charging expertise, UbiqPower delivers a fully turnkey charging solution — design, supply, and installation — at absolutely no upfront cost to strata corporations, multi-unit residential developers, and commercial property owners.

ELIGIBLE PROPERTIES

- Commercial Buildings
- Retail Properties
- Multi-Family Residential
- Strata Corporations

\$0

Your upfront investment. UbiqPower funds the full project.

PROCESS

How the Program Works

- Contact an EVSE Sales Specialist and apply for the **Zero Cost EV Charger Program**.
- Submit your online application at **www.ubiqpower.com** — a simple, guided process.
- A UbiqPower team member visits and qualifies your site. Acceptance is at UbiqPower's sole discretion.
- Upon approval, UbiqPower coordinates the final Agreement, installation schedule, and onboarding.

ELIGIBILITY

Qualification Criteria

- ✓ Sufficient electrical capacity to support the desired number of EV charging stations
- ✓ Valid property license authorizing EV charger installation
- ✓ Ability to obtain all required permits from regulatory authorities
- ✓ Site accessible 24/7 by EV drivers
- ✓ BC Hydro billing consolidated under a single company name
- ✓ End users pay the recommended charging fee per session

REVENUE

Profit Sharing Model

10%

Monthly Net Profit distributed to the Property Owner or Agreement Holder — with zero capital investment required. Payment policy set jointly between UbiqPower and the property owner.

AGREEMENT

Terms at a Glance

AGREEMENT TERM

5 Years

Extendable upon mutual agreement

TERMINATION NOTICE

90 Days

Written notice from either party

CHARGER OWNERSHIP

UbiqPower

Purchase option available at term end

UPFRONT COST

\$0.00

Full project funded by UbiqPower

OPERATIONS

Access, Maintenance & Warranty

Property owners must permit EV driver access during normal operating hours. UbiqPower covers all standard warranty repairs during the term. Owners are responsible for maintaining a secured environment; costs from vandalism or user damage are the property owner's responsibility.

EQUIPMENT

Charging Station Specifications

L3 DC FAST CHARGER

- **Protocol:** OCPP 1.6 compliant — cloud-manageable via Central Management System
- **Connectivity:** Wired or Wireless; supports pricing rules & load management
- **Interfaces:** CCS1 and NACS (Tesla)
- **Input Power:** 480 Vac
- **Rating:** IP55, NEMA 3R — outdoor-rated
- **Upgrade path:** Upgradeable to faster DC L3 units where commercially feasible

LEVEL 2 AC CHARGER (32A)

- **Protocol:** OCPP 1.6 compliant — cloud-manageable via Central Management System
- **Connectivity:** Wired or Wireless; supports pricing rules & load management
- **Interface:** SAE J1772
- **Input Power:** 200–240 Vac
- **Rating:** IP55, NEMA 3R — indoor/outdoor rated

* Actual products may differ. Optional cloud plan required for pricing rules and load management.

BACKGROUND

About UbiqPower

Since 2015, the Foreseeson Group has delivered comprehensive turnkey EV charging solutions — from infrastructure guidance and site surveys to installation, activation, maintenance, and carbon credit aggregation. UbiqPower Technology Co. was established to serve end-users at scale, combining EV Infrastructure, Energy Storage, Green Renewable Power, and EV Battery Reuse.

QUESTIONS

Frequently Asked Questions

Who will own the charging stations?

UbiqPower retains ownership throughout the 5-year agreement. Upon expiry, the strata or property owner may exercise an option to purchase the units or extend the agreement.

Who is responsible for the electrical bill?

Electricity costs are managed through the strata corporation or property owner and billed via BC Hydro, with UbiqPower responsible for those charges.

How are carbon credits handled?

All carbon credits generated by the program are retained exclusively by UbiqPower for the duration of the agreement.

How many chargers can a property receive?

UbiqPower holds exclusive authority to determine charger allocation per property, based on electrical capacity, EV driver demand, and minimum installation thresholds.

Is an upgrade to faster DC chargers possible?

Yes. UbiqPower may upgrade AC L2 units to DC L3 chargers — or to faster DC L3 units — where commercially viable and by mutual written agreement. Upgrades require a 480V EV-Ready connection.
